

The Chinese University of Hong Kong

Data Sharing in Hong Kong: How's our Culture

Dr. Kelvin KF Tsoi

Associate Professor (Research)

Stanley Ho Big Data Decision Analytics Research Centre

Jockey Club School of Public Health and Primary Care

香港中文大學醫學院

Faculty of Medicine

The Chinese University of Hong Kong

My Background

- BSc in Statistics, **CUHK**
- Statistical Programmer in **Hospital Authority**
- PhD in Public Health, **CUHK**
- Assistant Professor in Division of Gastroenterology, Department of Medicine and Therapeutics, **CUHK**
- Research Scientist (Statistician) in **Hospital Authority**
- Associate Professor (Research) in

Big Data Decision Analytics Research Centre, CUHK

Hong Kong

The Chinese University of Hong Kong

Land Size Around 1,100 km²

Over 7 Million Population

Patient Loading in Hong Kong

Hospital Authority (HA)

The HA is established under the Hospital Authority Ordinance in 1990. It has been responsible for managing Hong Kong's public hospitals services since December 1991.

- 42 hospitals & institutions
- 47 Specialist Out-patient Clinics
- 73 General Out-patient Clinics
- 27,440 beds
- 70,000 staffs

(Updated until 2015)

Hong Kong's 3-Tier Healthcare System

Primary Care
(Distribution of consultation)

Secondary & Tertiary Care

Long Term Care

Public Private Chinese Medicine Practitioners Others

PHS

(Pharmaceutical Supplies System)

CMS

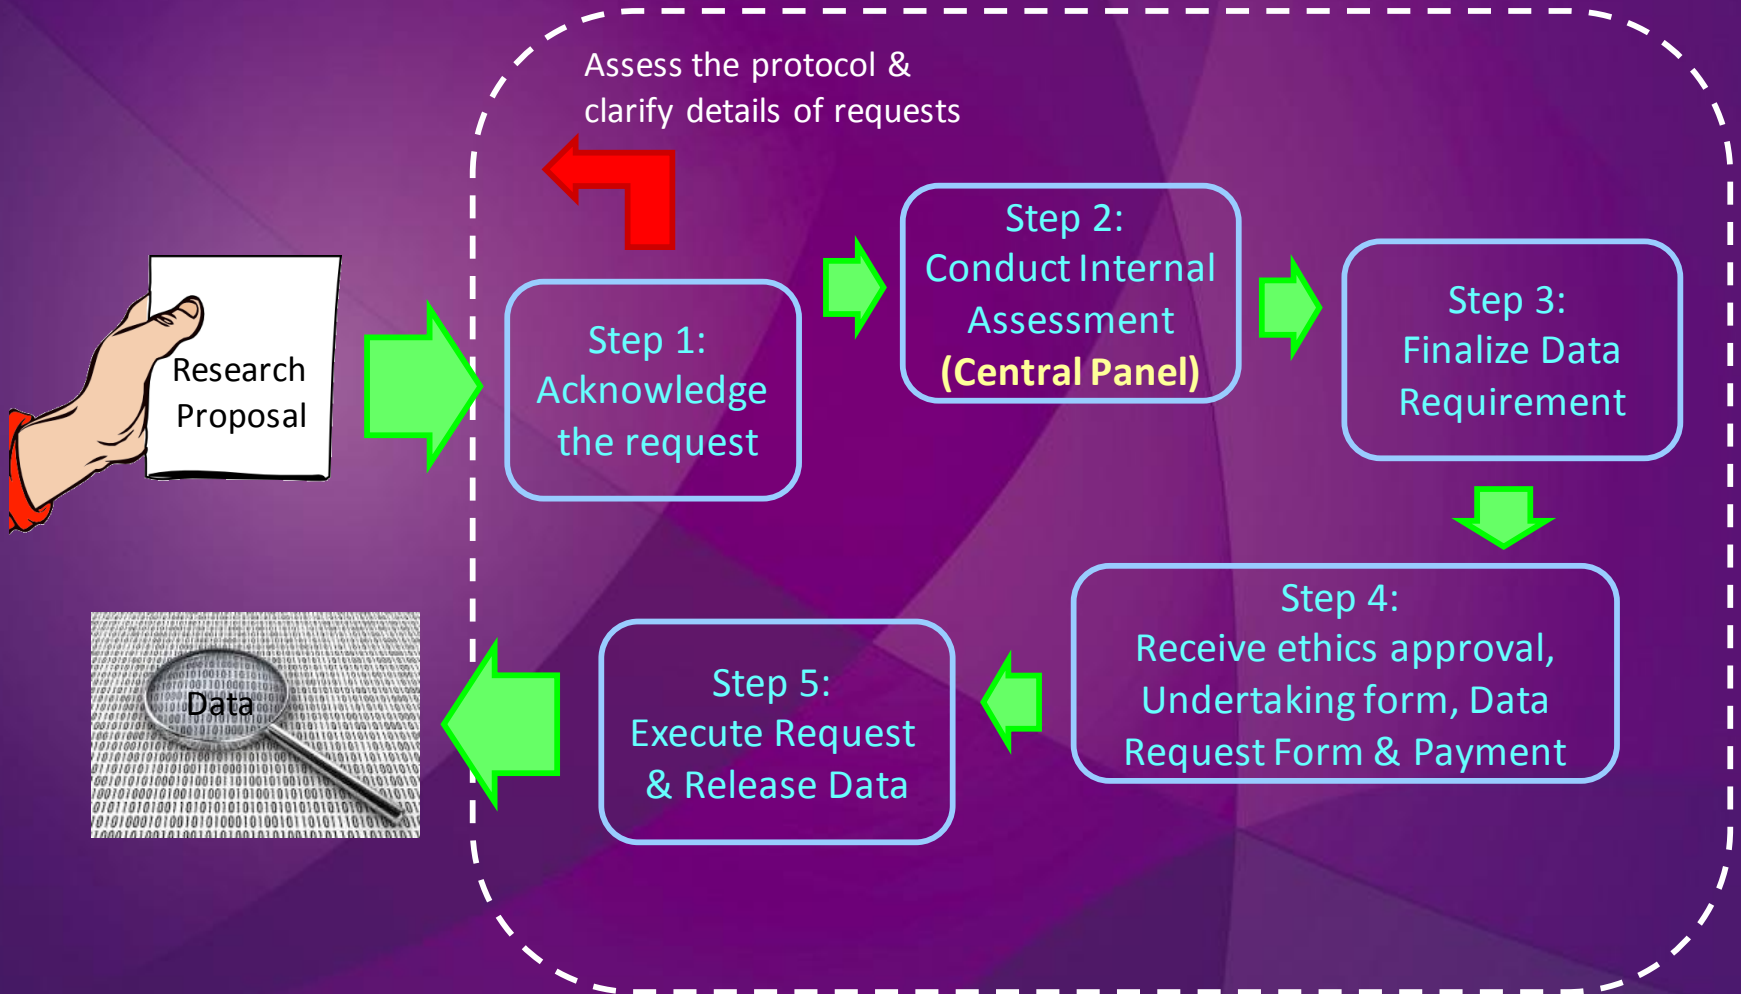

(Clinical Management System)

Discharge

Workflow of Data Requests

Central Panel for Data Requests

- Central Panel on Administrative Assessment (CPAA) was formed to handle external data requests:
 - To ensure the requested data are relevant to the protocol
 - To evaluate the requested data are of reasonable quality
 - To protect the personal data privacy
 - To assess the workload of data extraction is reasonable
- Decision for the data requests:
(i) Accept; (ii) Conditional Accept; or (iii) Decline

Structure of Central Panel

Cluster Research Ethics Committees (RECs)

<p>Chief Manager (CM) (Clinical Effectiveness & Technology Management) <u>Dr. XXX</u> to act as Convenor</p>	<p>Chief Manager (CM) (Statistics & Workforce Planning) <u>Ms. XXX</u> to execute the process of data extraction</p>
<p>Chief Information Officer <u>Dr. XXX</u> to advise on data from IT systems</p>	<p>Chief Information Security & Privacy Officer <u>Mr. XXX</u> to advise on matters related to data privacy</p>

Directors'
Meeting

+ / -

CMs of relevant COC/CCs (to inform COC/CC members)
Other relevant subject officers (to check data quality)

Classification of Data Requests

- A. **Identifiable** patient-based records
- B. **De-identified** patient-based records
- C. **Aggregate data** of HA patients / service utilization

An Example of Using the HA Dataset

What can we (CUHK) do?

- We have NO dataset to share
- Our works are always on project-based
- My research focus also have to be “Disease Specific”
- but...

We have research experience on open data

We use platform to capture and visualize data (IBM Watson)

Potential opportunities are coming

- From open to ‘unopen’ data, e.g. US cancer registry
- No data sharing Platform in China and Asia

Interdisciplinary to Transdisciplinary

Thank you!
